## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method of drying a lactulose solution, classified in class 34, subclass 406.
- II. Claims 12-15 and 17-18, drawn to a lactulose-containing powder, classified in class 424, subclass 93.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as a process of drying a lactulose solution and a lactulose containing powder. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant application, the lactulose powder product does not require the limitations of the method of drying a lactulose solution, and therefore, the powder product is capable of being produced using a materially different process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3749

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
